

Instruction

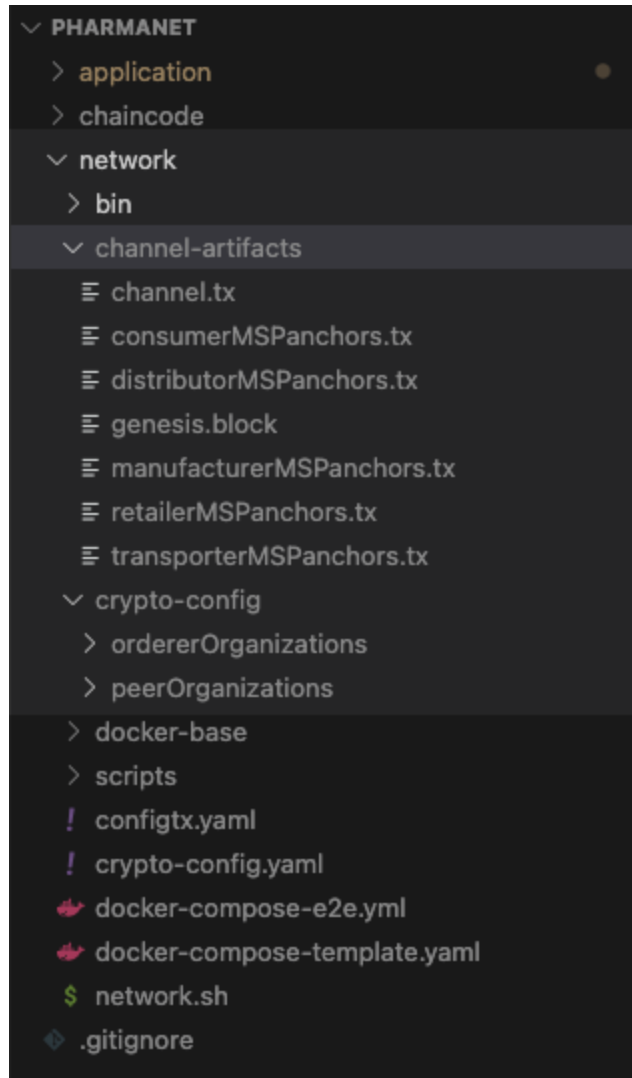

Starting up blockchain network

Move to the network folder, and use the `network.sh` and generate crypto configs and channel artifacts.

```
cd network/  
sh network.sh generate
```

Above command with generate crypto config, Genesis block file, channel creation transaction with directory `channel-artifacts` and `crypto-config` under network folder.

```
➤ r0d05m@e-c02711f0d0n pharmanet % cd network  
➤ r0d05m@e-c02711f0d0n network % sh network.sh generate  
Generating certs and genesis block for channel 'pharmachannel' with CLI timeout of '15' seconds and CLI delay of '5' seconds and chaincode version '1.1'

```

Next, We need to issue `up` command using the same script. Which will start the docker container for all the peers, using Docker Compose config, create a channel named `PharmaChannel` and make all the peers join the network. Once every peer joins the network, it will select the `peer0` of each organisation as the anchor peer. Make sure Docker daemon is running while issuing the below command:

```
sh network.sh up
```

```

○ f0d05m@-c0271fmd5n network % sh network.sh up
Starting for channel 'pharmachannel' with CLI Timeout of '15' seconds and CLI delay of '5' seconds and chaincode version '1.1'

```

Setting the anchor peer for each organisation

Installing Chaincode

Move to the the `chaincode` folder, and install npm dependencies using the below command:

```
cd ../chaincode
npm i
```

```

● r0d05mv@m-c02ft1lfmd6n network % cd ../chaincode
● r0d05mv@m-c02ft1lfmd6n chaincode % npm i
npm WARN EBADENGINE Unsupported engine {
npm WARN EBADENGINE   package: 'fabric-contract-api@2.5.2',
npm WARN EBADENGINE   required: { node: '^16.4.0', npm: '^8.0.0' },
npm WARN EBADENGINE   current: { node: 'v18.9.0', npm: '8.19.1' }
npm WARN EBADENGINE }
npm WARN EBADENGINE Unsupported engine {
npm WARN EBADENGINE   package: 'fabric-shim@2.5.2',
npm WARN EBADENGINE   required: { node: '^16.4.0', npm: '^8.0.0' },
npm WARN EBADENGINE   current: { node: 'v18.9.0', npm: '8.19.1' }
npm WARN EBADENGINE }
npm WARN EBADENGINE Unsupported engine {
npm WARN EBADENGINE   package: 'fabric-shim-api@2.5.2',
npm WARN EBADENGINE   required: { eslint: '^6.6.0', node: '^16.4.0', npm: '^8.0.0' },
npm WARN EBADENGINE   current: { node: 'v18.9.0', npm: '8.19.1' }
npm WARN EBADENGINE }

up to date, audited 548 packages in 4s

6 packages are looking for funding
  run `npm fund` for details

24 vulnerabilities (10 moderate, 6 high, 8 critical)

To address issues that do not require attention, run:
  npm audit fix

To address all issues (including breaking changes), run:
  npm audit fix --force

Run `npm audit` for details.

```

Chaincode dependencies installation

Move to `network` folder and issue the `install` command using `network.sh` script. Optionally you can pass the version of your chaincode using the `-v` argument.

```
sh network.sh install
```

```

r0d05m@-c82ftllfndn network % sh network.sh install
Installing chaincode for channel 'pharmachannel' with CLI timeout of '15' seconds and CLI delay of '5' seconds and chaincode version '1.1'

External chaincode builder for each peer

Starting up backend application

Move to the application folder and run a `npm install` command to install all the required dependencies.

```
npm i
```

```
r0d05mv@m-c02ft1lfmd6n application % npm i
up to date, audited 200 packages in 5s

14 packages are looking for funding
  run `npm fund` for details

4 vulnerabilities (1 moderate, 3 high)

To address issues that do not require attention, run:
  npm audit fix

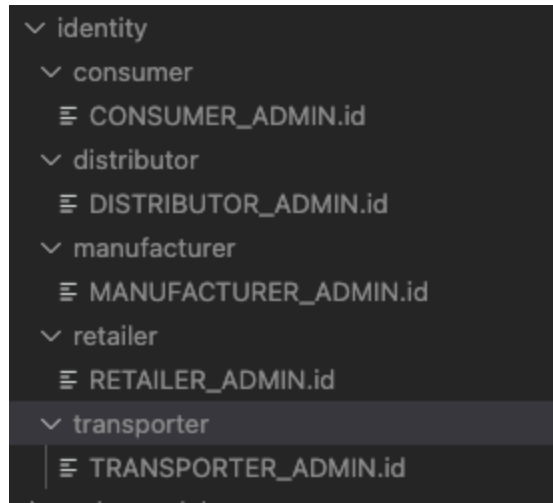

To address all issues (including breaking changes), run:
  npm audit fix --force

Run `npm audit` for details.
```

Start the node application using the below command. Node will start listening to port `3000`. This will also initiate a `wallet` under `identity` folder and add identity for each organisation.

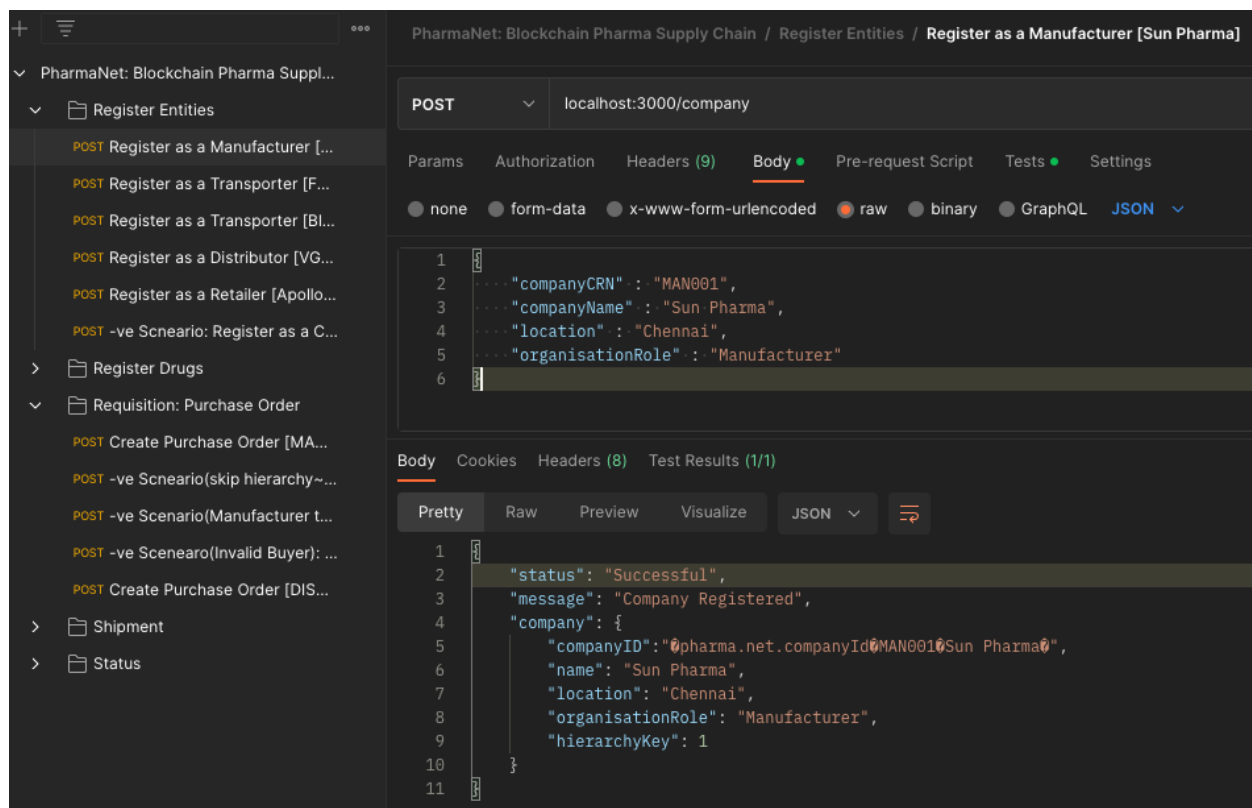

```
node .
```

```
r0d05mv@m-c02ft1lfmd6n application % node .
Distributed PharmaNetwork App listening on port 3000!
User - Consumer identity added to wallet.
User - Distributor identity added to wallet.
User - Manufacturer identity added to wallet.
User - Retailer identity added to wallet.
User - Transporter identity added to wallet.
```

Use the Postman collection given to import the Collection to postman and try each functionalities.

Register as a Manufacturer

Registering another entity with same CRN and Name would result in a failure

PharmaNet: Blockchain Pharma Supply Chain / Register Entities / Register as a Manufacturer [Sun Pharma]

11 }
```

Registering as customer would fail as operation is not allowed

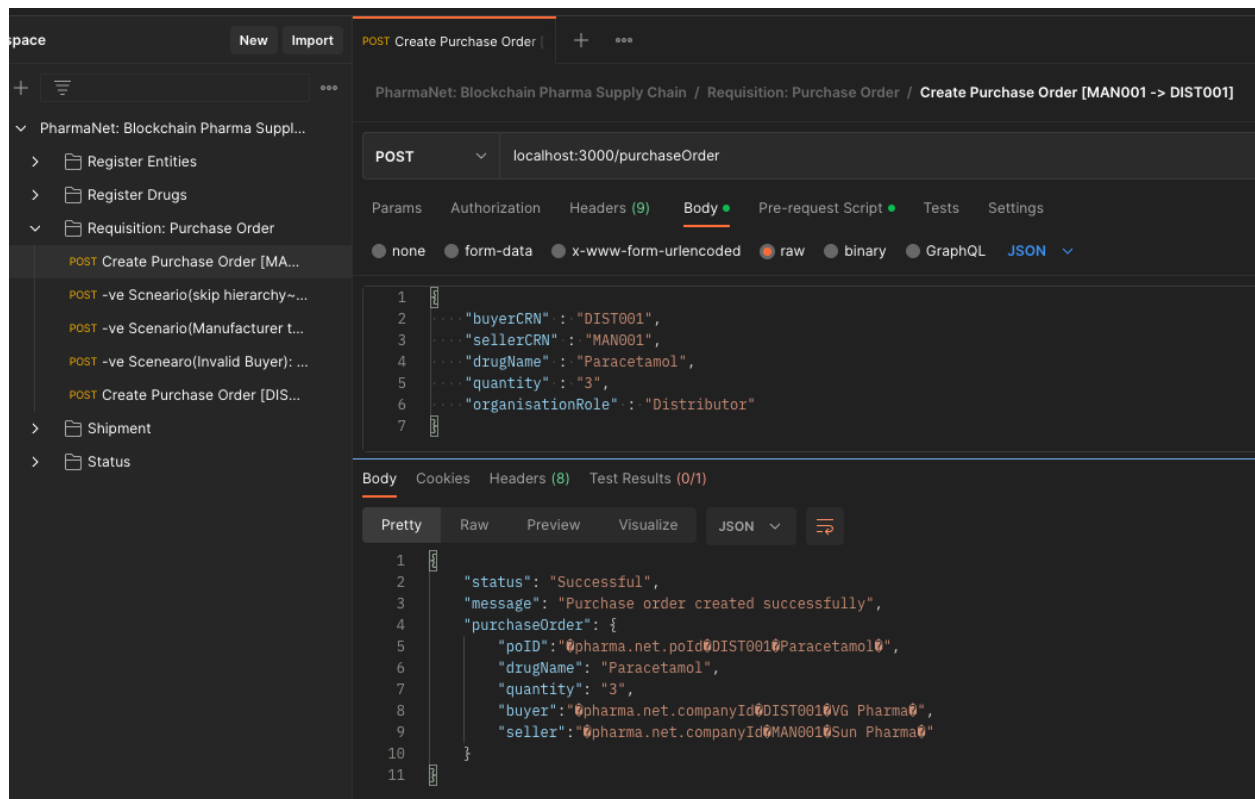

Registering Drugs

We will registering 3 drugs in total with name: Paracetamol with serial number 001,002 and 003 respectively. Initial shipment status will be in-warehouse with owner being the manufacturing entity.

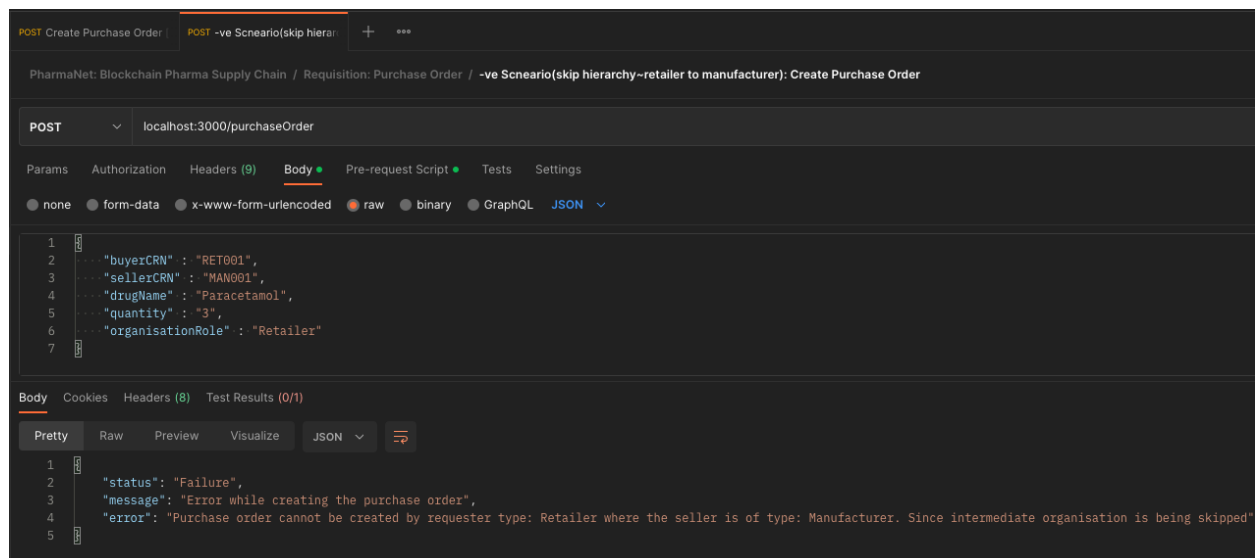

Creating Purchase Order

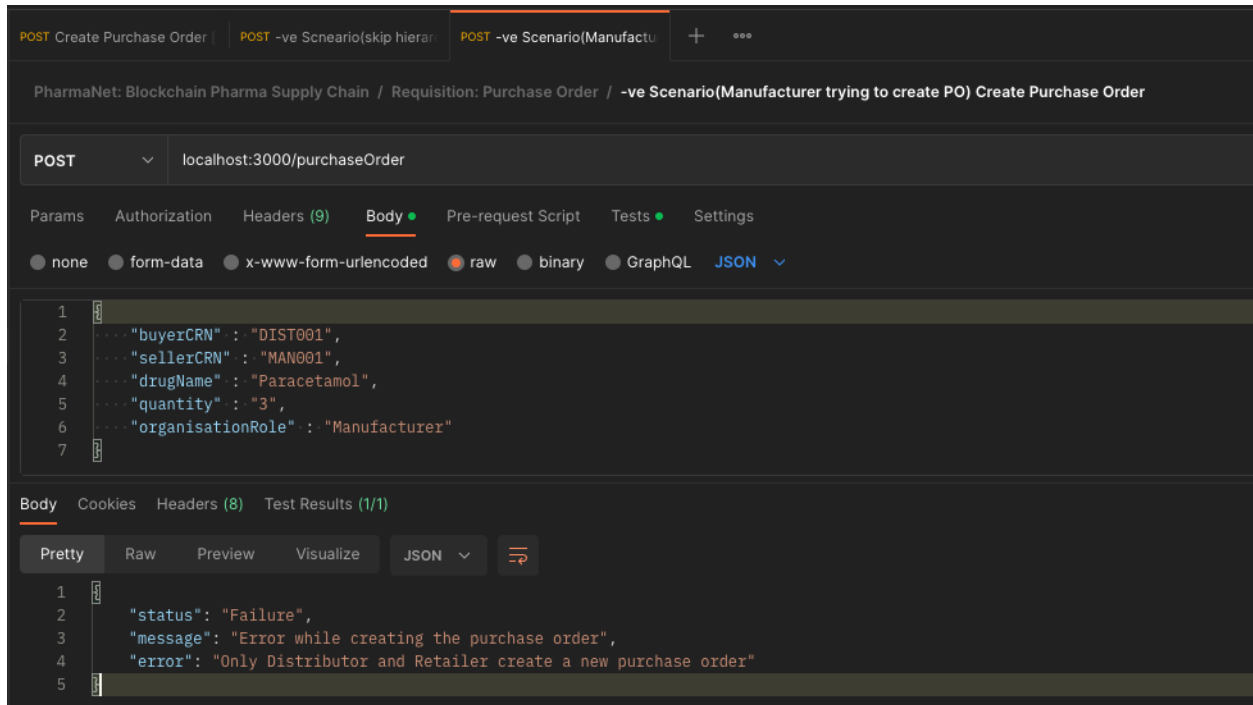

Creating new PO request by buyer: DIST001 for seller: MAN001. Drug: Paracetamol | Qty: 3

PO creation fails when retailer tries to create PO to buy directly from manufacturer

PO creation fails when manufacturer tries to create it.

PO Creation fails when buyer CRN is invalid

POST -ve Scenearo(Invalid Bu) + ...

PharmaNet: Blockchain Pharma Supply Chain / Requisition: Purchase Order / -ve Scenearo(Invalid Buyer): Create Purchase Order

POST localhost:3000/purchaseOrder

Params Authorization Headers (9) Body Pre-request Script Tests Settings

none form-data x-www-form-urlencoded raw binary GraphQL JSON

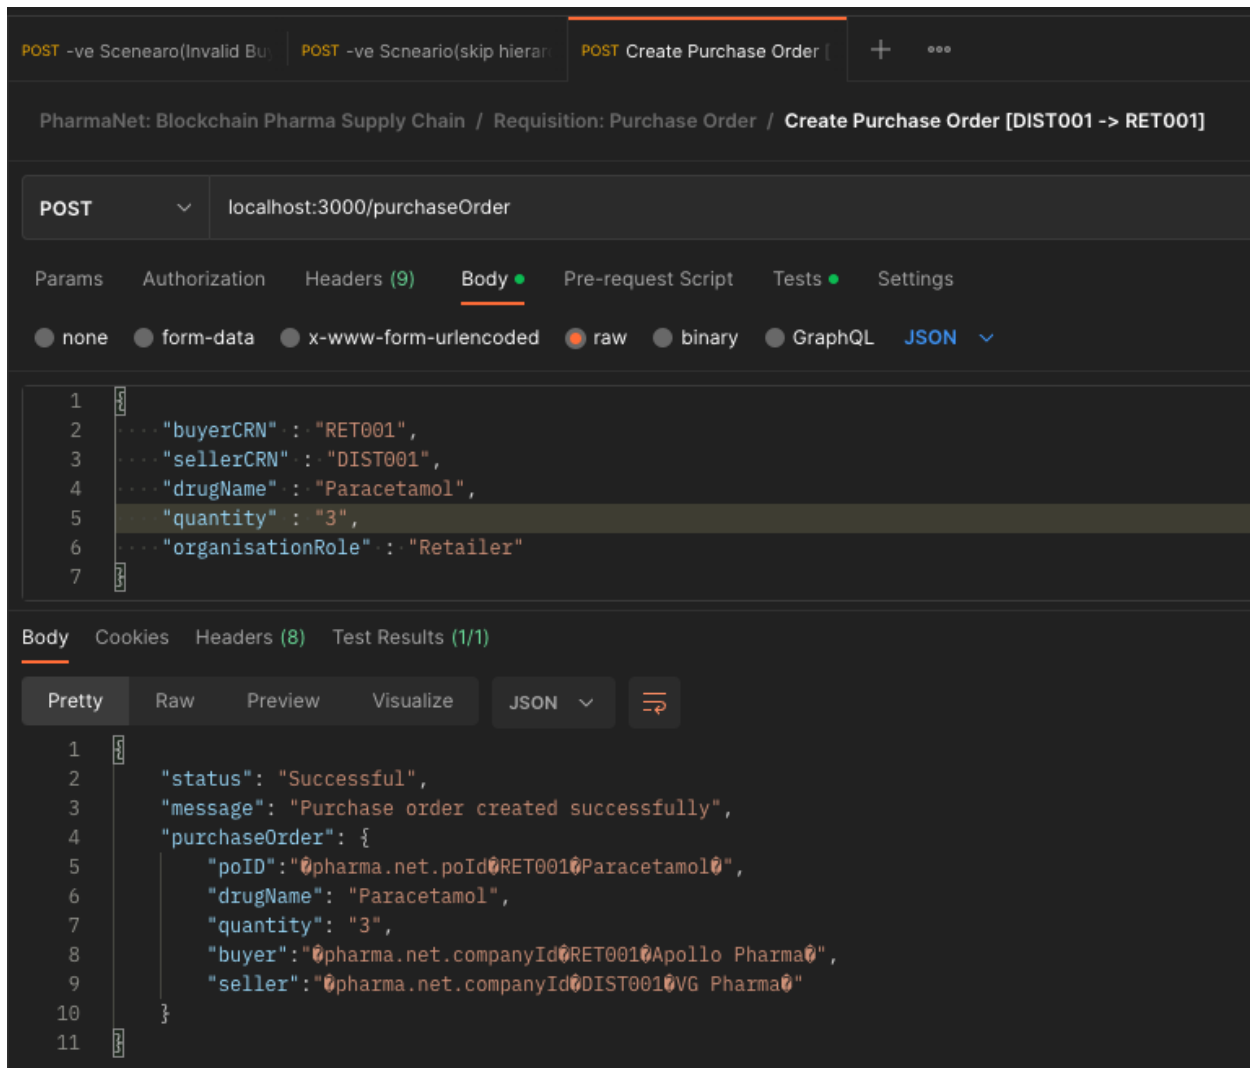

```
1 {
2   ... "buyerCRN" : "INVT001",
3   ... "sellerCRN" : "MAN001",
4   ... "drugName" : "Paracetamol",
5   ... "quantity" : "3",
6   ... "organisationRole" : "Distributor"
7 }
```

Body Cookies Headers (8) Test Results (0/1)

Pretty Raw Preview Visualize JSON

```
